

April 29, 2022: Construction Update No. 50 Bridge Avenue Reconstruction Project

The final construction activities to complete on the Bridge Avenue Reconstruction Project will resume on May 2, 2022. Bridge Avenue will remain open for the majority of the work activities, but there may be traffic impacts that will require short-term, temporary lane closures. Please proceed with caution through the work zone. We anticipate one closure of Bridge Avenue between Hammer and Eastgate and will provide additional notification when details and timeframe are solidified. We anticipate this being a single day closure, one-time only occurrence.

Construction activity to be completed this week will include:

- Tree planting along the corridor
- Concrete repair work
- Final sod restoration
- Preparing Bridge Avenue for final wear paving
- Final lift of bituminous paving and striping

Safety is always our highest concern during construction of these types of projects:

- Please slow down through construction zone for the safety of others, and the workers on site, as well as your own safety. Avoid using a cellular phone when walking or driving near a construction zone.
- Please stay clear of machinery and construction trenches in the work zone. Construction vehicles can move quickly and suddenly. Staying alert to your surroundings reduces the likelihood of an incident.
- In addition, your assistance in directing your children away from construction areas is appreciated.

Thank you for your consideration and patience. For any questions or concerns you may contact the following at SRF Consulting:

Project Engineer: Dan Herzog, 763-452-4826, dherzog@srfconsulting.com

Project Inspector: Tom Schuster, 612-247-5194, tschuster@srfconsulting.com
